Our Vision:

It is our vision to make a significant difference in the infrastructure development of South Africa and Africa by maintaining relationships, trust, stakeholders and the environment we function in.

Our Mission:

To build a reputable company that functions optimally by forming unique innovative solutions to customers in the construction, mining and agricultural sectors of Africa.

To achieve this mission our focus would be to:

- Approach with Respect
- Think Holistically
- Plan with Precision
- Act with Passion
- Celebrate with Pride

We believe that nothing is steadfast that is not true

Background:

The jockeys:

Johan Gouws (Director) – Is a third generation of the Gouws family that has gone into the business of earth moving. His love for soil and the working therewith made him study a B.Sc. Agricultural Economics at the University of Pretoria. His quest for honing his entrepreneurial skill made him study further to obtain a MBA degree at University of Stellenbosch focusing on the reclamation of mine soils. His positive and energetic approach to life gets things done.

Stanley Godi (Director) – Is the maverick of business and finance with a B.Com Marketing degree and specialised training and knowledge in emerging markets and developing economies with almost 20years experience in commercial banking makes him an expert on structuring deals to benefit all related parties. His trustworthy and flamboyant personality makes one feel comfortable in his presence to discuss business matters.

What we do:

We have the following experience and assets to our disposal in the various industries of construction, mining and agriculture.

Earth works & Environmental contracting – Load and haul, Topsoil shaping and stripping.

Vegetation management – Grass cutting, bush clearing.

Rural concrete/cement mixing – With aggregates at hand we can mix and deliver concrete and cement with a guaranteed quality and very competitive price on any site anywhere.

Plant Hire – Plant hire is how we started out and our success is built on quality operators and relevant machines for the job.

www.swiatkoparek.pl

Machine management – To enable us to deliver a proper service by means of our machines we need to do proper maintenance and management of our assets. We provide field service not only to our own machines but also to customers. We manage their fleets for them to make sure the necessary maintenance is done when it must be done.

Why use us:

- We are a 51% black owned company with a BEE level of 3
- Tax clearance available from SARS
- CIBD level 1 registered
- Letter of good standing - Workman compensation.

Johnrope Pty Latest Project Involvement:

Vegetation management and maintenance in Mpumalanga

JohnRope is busy in their second year to manage Eskom's fire breaks under transmission lines by cutting grass and applying vegetation management solutions on the Highveld under Ugezi Electrical. This include proper clearance under power lines whatever the vegetation. The total amount of power lines allocated is about 300km in Mpumalanga.

Client representative for Ugezi: Cobus Jackson – 083 414 6136

Plant Hire to Liviero civils

Liviero is the largest private construction company in South Africa. To earn their trust and respect takes effort and commitment.

Client representative for Liviero: Andre Theron – 084 252 4271

Plant Hire to Esorfranki civils

Esorfranki is a listed company and one that has a reputation to uphold. This company will not work with rookies.

Client representative for Esorfranki: JT Enslin – 072 140 6735

Management of Plant for Chiefton civils

The management and maintenance of the Chiefton plant to ensure they achieve maximum results is our priority.

Client representative for Chiefton: Kobus Robertse – 084 840 0891
